

Five NCR LGUs now at low risk as of Feb 7 2022

Caloocan, Pateros, Navotas, Taguig and Marikina are now classified as low risk as their ADAR decreased to less than 10 (moderate) and positivity rate improved to 9.6% (moderate). Their reproduction numbers and healthcare utilization rates were in the very low category. This resulted in an overall classification of low risk. The NCR remained under moderate risk but is very close to moving down to low risk. Several other LGUs in the NCR are under moderate risk but are close to being classified as low risk. While Covid trends improve, the public is advised to continue to observe health protocols.

	ADAR	R_t	HCUR	Positivity
Caloocan	4.07	0.28	20%	9.6%
Pateros	7.23	0.18	6%	9.6%
Navotas	7.76	0.41	0%	9.6%
Taguig	8.71	0.28	15%	9.6%
Marikina	9.20	0.28	17%	9.6%
NCR	8.93	0.30	32%	9.6%
